

MetOptima

For gold mines looking to improve throughput, recovery and cost efficiency, Draslovka's MetOptima is the answer.

It is an always-on AI metallurgist that provides plant operators with the following benefits:

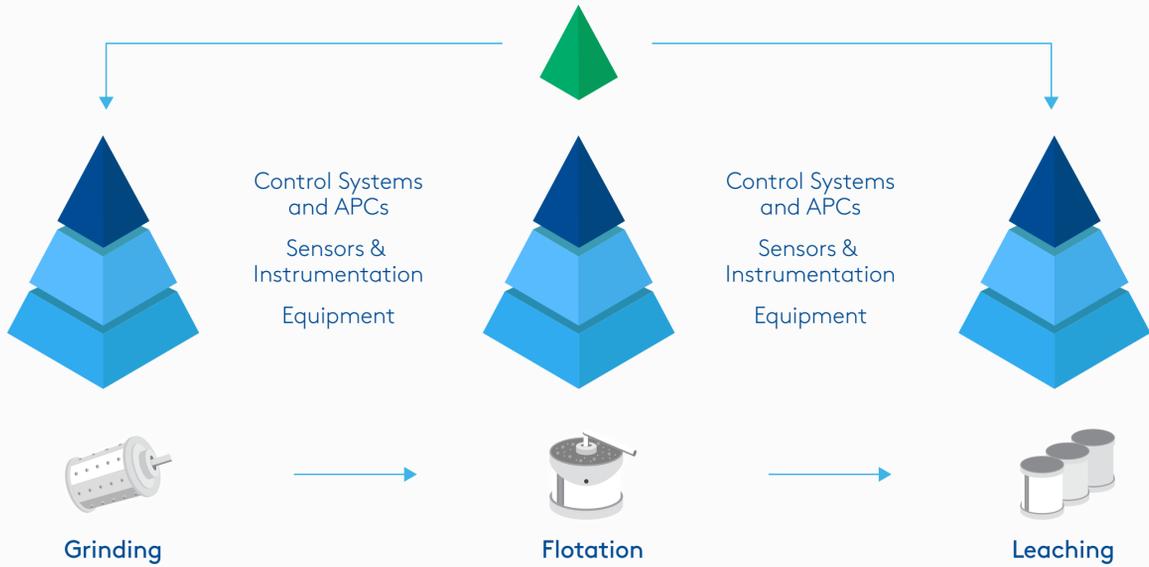

How it works

MetOptima
Always-on AI metallurgist and operator

Traditional controls and enablers

Process

MetOptima **System level**

Control logic **Subsystem level**

Enablers **Equipment level**

MetOptima leverages AI and machine learning to determine your optimal setpoints across the entire circuit from grinding to flotation and leaching - allowing you to optimize your plant every 4 hours.
